Hey Eric,

Note that updated QM data have been posted to the link below. The data dated 08/14/08 will include the updates that were posted on July 29 (for those who have not updated there QM projects recently). Also note that for those who did NOT download the July 29 update, they will need to update their dictionary file by downloading and installing the 07/29/08 dictionary file.

The only remaining data not included in this update are the Round 3B tissue data and the statistics for the Round 3B bioassay data and these will be added fairly soon. Stay tuned

-R

Hi everyone,

Please find the August 14 Willamette River data posted to response.restoration.noaa.gov/querymanager.

The IC reports for the three datasets had no change from the July 29 posting.

No updated dictionaries were posted at this time.

Thanks,

Dan

P.S. IC reports can be found at:

ftp://ftp.orr.noaa.gov/private/ARD/Query_Manager/Reports/Willamette/

Jay/Rob/Ben/Dan -
I have posted three new Willamette River files to the NOAA FTP server in the folder named as follows:

non-responsive

non-responsive

To the latest version, the following updates have been made:

- Calculated the percent fines values for the previously added Round 3 bioassay study chemistry data.
- Added chemistry data from the Willamette Cove sediment study.
- Added chemistry data from the Round 3 Sediment Grab study.

The tissue data is the last remaining set of Round 3 data to add and we have the bioassay data to update with statistical significance results.

Further updates will be available in mid-September.

Thanks,

Corinne
